1973 INDEX OF ARTICLES PUBLISHED IN MATERIALS ENGINEERING

INDEX OF FEATURE ARTICLES

ALUMINUM AND ITS ALLOYS

Almost any component is a candidate for aluminum extrusion--Aug, p 20
Basic guide to fasteners--Apr, p 48
The economics of materials--Jan, p 19
Honeycomb structures maintain strength while cutting weight--Nov, p 36
Joining processes for aluminum reduce pollution, cut costs--Mar, p 60
Materials fight heat in small appliances--Feb, p 41
Organic, inorganic coatings hold back heat and fire--Feb, p 57

BERYLLIUM

Magnesium and beryllium save weight and conserve energy--Jan, p 30

BORON

Diffused boron ups hardness, wear resistance of metals--Apr, p 70
Try a little boron for more formable, deep-hardening steels--July, p 34

CASTINGS

Die castings vs plastic moldings--Dec, p 24

CERAMICS

Glass: the shape of things to come--it will be stronger, more functional--Nov, p 26
New, improved silicon nitride vies for high performance bearings--Nov, p 30
Piezoelectric ceramics: novel engineering materials--Aug, p 38
There's more to alumina ceramics than good dielectric properties--May, p 73
Want tougher carbon and graphite? Try metal or ceramic impregnation--Sept, p 42

COATINGS

Basic guide to fasteners--Apr, p 48
Coated plastic foams live a lot longer than uncoated--Sept, p 56
The economics of materials--Jan, p 19
Guide to the selection of galvanized sheet steel--Mar, p 32
High speed electroplating cuts costs, reduces pollution--May, p 29
The importance of color in product design--May, p 22
Living with the energy crisis in industrial paint finishing--Oct, p 40
Looking for a solution to pollution? Try water-borne coatings--July, p 22
Now flame spray away wear problems as never before--Jan, p 46
Organic coatings today: it's time for a change--June, p 50
Organic, inorganic coatings hold back heat and fire--Feb, p 57
Refractory metals fight heat, resist corrosion--June, p 38
Reinforced plastic parts: should they be painted--Mar, p 74
Scuffs and scratches snuffed with polyurethane coatings--Apr, p 67
Use these two charts to determine the cost of coatings--Nov, p 46

COBALT

Materials fight heat in aircraft jet engines--Feb, p 18

COLUMBIUM

A guide to fasteners for use at elevated temperatures--Feb, p 69
Materials fight heat in aircraft jet engines--Feb, p 18
Refractory metals fight heat, resist corrosion--June, p 38

COMPOSITES

Graphite and carbon composites move closer to less exotic uses--July, p 59
Honeycomb structures maintain strength while cutting weight--Nov, p 36
Materials fight heat in aircraft jet engines--Feb, p 18
NDT may open the way to wider use of composite structures--Mar, p 68
New reinforcing fiber fills void between glass and carbon fibers--Sept, p 66
Steel bonded carbides combine hardness and machinability--Oct, p 46
Want tougher carbon and graphite? Try metal or ceramic impregnation--Sept, p 42

COPPER

The economics of materials--Jan, p 19
Metal alloys solve heat problems without sacrificing strength--Feb, p 27
Try copper to dampen noise, fight heat and for die casting--Apr, p 26

ELECTRICAL AND ELECTRONIC PROPERTIES AND MATERIALS

Materials fight heat in small appliances--Feb, p 44
Materials spark new growth in electronics technology: June, p 21
  A lot of light from a little lamp, p 26
  Communicate via light beams, p 29
  Magnetic bubbles shrink computer memories, p 27
  New ways to exploit single crystals, p 24
  Semiconductors: where it all began, p 22
  Superconductivity coming on fast, p 30

Piezoelectric ceramics: novel engineering materials--Aug, p 38
UL ratings only for materials, not for electrical products--Aug, p 34

FLAMMABILITY

ASTM flammability tests are for materials, not products--Aug, p 30
FTC says plastics are a serious fire hazard--Aug, p 27
National Commission says users not fully informed about plastics' fire hazards--Aug, p 28
Plastics flammability data are questioned--Dec, p 50
Product liability: A new concern in materials selection--Sept, p 74
UL ratings only for materials, not for electrical products--Aug, p 34

FORMING

Almost any component is a candidate for aluminum extrusion--Aug, p 20
Die castings vs plastic moldings--Dec, p 24
Form-in-place gaskets are leak-free, low-cost--Jan, p 58
P/M forgings: a rapidly emerging technology--Sept, p 20
Take another look at what injection molding can do today--Sept, p 38

GLASS

Glass: the shape of things to come--it will be stronger, more functional--Nov, p 26

HIGH TEMPERATURE PROPERTIES AND MATERIALS

Applications prove the worth of high-heat resistant plastics--Feb, p 41
Chemically inert precious metals good for tough thermal uses--Oct, p 22
A guide to fasteners for use at elevated temperatures--Feb, p 69
High temperature adhesives are easy to apply, usable up to 700 F--May, p 60
Materials fight heat in aircraft jet engines--Feb, p 18
Materials fight heat in small appliances--Feb, p 44
Metal alloys solve heat problems without sacrificing strength--Feb, p 41
Organic, inorganic coatings hold back heat and fire--Feb, p 57
Refractory metals fight heat, resist corrosion--June, p 38
Rubbers and plastics fight heat under the hood of automobiles--Feb, p 49
Silicone rubbers resist heat, cold, weathering, chemicals--Apr, p 40
Titanium alloys are stronger and resist higher temperatures--May, p 53
Try copper to dampen noise, fight heat and for die casting--Apr, p 26

JOINING, FASTENING AND SEALING

Advances in joining technology--a survey--Oct, p 52
Basic guide to fasteners--Apr, p 48
Form-in-place gaskets are leak-free, low-cost--Jan, p 58
A guide to fasteners for use at elevated temperatures--Feb, p 69
High temperature adhesives are easy to apply, usable up to 700 F--May, p 60
An introduction to anaerobics--July, p 50
Joining processes for aluminum reduce pollution, cut costs--Mar, p 60
Try structural adhesives to reduce cost of joining metals and plastics--Dec, p 34
Use heat to join heat resistant plastic films--Feb, p 71

MATERIALS APPLICATIONS

Applications prove the worth of high-heat resistant plastics--Feb, p 41
Chemically inert precious metals good for tough thermal uses--Oct, p 22
Economical nuclear power: reliable reactor materials are the key--Mar, p 29
Foamed plastics show the way to big, lightweight, structural parts--Mar, p 48
Graphite and carbon composites move closer to less exotic uses--July, p 57
Materials fight heat in aircraft jet engines--Feb, p 18
Materials fight heat in small appliances--Feb, p 44
Materials spark new growth in electronics technology--June, p 21
Metal alloys solve heat problems without sacrificing strength--Feb, p 27
New, improved silicon nitride vies for high performance bearings--Nov, p 30
Piezoelectric ceramics: novel engineering materials--Aug, p 38
Rubbers and plastics fight heat under the hood of automobiles--Feb, p 49
Try copper to dampen noise, fight heat and for die casting--Apr, p 26
What makes a good bicycle--June, p 12

MAGNESIUM AND ITS ALLOYS

Magnesium and beryllium save weight and conserve energy--Jan, p 30

NICKEL AND ITS ALLOYS

Economical nuclear power: reliable reactor materials are the key--Mar, p 29
The economics of materials--Jan, p 19
A guide to fasteners for use at elevated temperatures--Feb, p 69
Materials fight heat in aircraft jet engines--Feb, p 18
Metal alloys solve heat problems without sacrificing strength--Feb, p 27

NOISE CONTROL

Try copper to dampen noise, fight heat and for die casting--Apr, p 26

P/M

The economics of materials--Jan, p 19
P/M forgings: a rapidly emerging technology--Sept, p 20

PLASTICS

ASTM flammability tests are for materials, not products--Aug, p 30
Applications prove the worth of high-heat resistant plastics--Feb, p 41
Basic guide to fasteners--Apr, p 48
Coated plastic foams live a lot longer than uncoated--Sept, p 56
The economics of materials--Jan, p 19
FTC says plastics are a serious fire hazard--Aug, p 27
Foamed plastics show the way to big, lightweight structural parts--Mar, p 48
Gardner impact vs Izod--which is better for plastics?--Nov, p 52
Honeycomb structures maintain strength while cutting weight--Nov, p 36
Materials fight heat in small appliances--Feb, p 44
National Commission says users not fully informed about plastics' fire hazards--Aug, p 28
Plastics flammability data are questioned--Dec, p 50
Plastics vs time--Oct, p 29
Product liability: A new concern in materials selection--Sept, p 74
Reinforced plastic parts: should they be painted--Mar, p 74
Rubbers and plastics fight heat under the hood of automobiles--Feb, p 49
SMC reduce FRP costs and raise strength--Jan, p 38
Scuffs and scratches snuffed with polyurethane coatings--Apr, p 67
Structural plastic rods and beams are light and corrosion resistant--Apr, p 36
Take another look at what injection molding can do today--Sept, p 38
Try structural adhesives to reduce cost of joining metals and plastics--Dec, p 34
UL ratings only for materials, not electrical products--Aug, p 34
Use heat to join heat resistant plastic films--Feb, p 71
Want the best of two plastics? Take a look at an alloy--May, p 40
Wear resistant plastics: they need no lubrication--July, p 43

RARE EARTHS

High cost rare earth metals give a lot for the money--Nov, p 64

RUBBER AND ELASTOMERS

Be cautious in selecting rubbers for weathering resistance--June, p 60
The economics of materials--Jan, p 19
Form-in-place gaskets are leak-free, low-cost--Jan, p 58
Materials fight heat in small appliances--Feb, p 44
Rubbers and plastics fight heat under the hood of automobiles--Feb, p 49
Silicone rubbers resist heat, cold, weathering, chemicals--Apr, p 40
Take another look at what injection molding can do today--Sept, p 38

STEELS AND IRON

Basic guide to fasteners--Apr, p 48
Calcium deoxidized steels improve gear cutting--May, p 48
Diffused boron ups hardness, wear resistance of metals--Apr, p 70
Economical nuclear power: reliable reactor materials are the key--Mar, p 29
The economics of materials--Jan, p 19
A guide to fasteners for use at elevated temperatures--Feb, p 69
Guide to the selection of galvanized sheet steel--Mar, p 32
Heat treated plate steels are strong, tough, abrasion resistant--Dec, p 42
Materials fight heat in aircraft jet engines--Feb, p 18
Materials fight heat in small appliances--Feb, p 44
Metal alloys solve heat problems without sacrificing strength--Feb, p 27
New carburizing hardening process improves case and core properties--June, p 42
New galling data aid in selecting stainless steel--Apr, p 60
New method cuts time and costs in testing spring steels--June, p 77
P/M forgings: a rapidly emerging technology--Sept, p 20
Steel bonded carbides combine hardness and machinability--Oct, p 46
Try a little boron for more formable, deep-hardening steels--July, p 34

TANTALUM

Refractory metals fight heat, resist corrosion--June, p 38
Tantalum immune to most corrosive attack--Apr, p 24

TESTING

ASTM flammability tests are for materials, not products--Aug, p 30
Fourteen different ways to look at surfaces reveal much data--Aug, p 54
Gardner impact vs Izod--which is better for plastics--Nov, p 52
NDT may open the way to wider use of composite structures--Mar, p 68
New galling data aid in selecting stainless steel--Apr, p 60
New method cuts time and costs in testing spring steels--June, p 77
What's new in testing devices--Jan, p 51

TITANIUM

Basic guide to fasteners--Apr, p 48
Materials fight heat in aircraft jet engines--Feb, p 18
Metal alloys solve heat problems without sacrificing strength--Feb, p 27
Titanium alloys are stronger and resist higher temperatures--May, p 53

INDEX OF AUTHORS

Abolins, V., Gardner impact vs Izod--which is better for plastics--Nov, p 52

Blake, M., New, improved silicon nitride vies for high performance bearings--Nov, p 30

Chepko, F.E., Cooley, C.J., Try a little boron for more formable, deep-hardening steels--July, p 34

Flick, E.W., Use these two charts to determine the cost of coatings--Nov, p 46

Furr, S.T., New method cuts time and costs in testing spring steels--June, p 77

Jackson, K.A., Fourteen different ways to look at surfaces reveal much data--Aug, p 54

Kolek, R.L., New reinforcing fiber fills void between glass and carbon fibers--Sept, p 66

Longo, F.N., Now flame spray away wear problems as never before--Jan, p 46

Mal, M.K., Tarkan, S.E., Diffused boron ups hardness, wear resistance of metals--Apr, p 70
Steel bonded carbides combine hardness and machinability--Oct, p 46

Mara, P.V., Almost any component is a candidate for aluminum extrusion--Aug, p 20

Miska, K.H., Advances in joining technology--a survey--Oct, p 52
Chemically inert precious metals good for tough thermal uses--Oct, p 22
Economical nuclear power: reliable reactor materials are the key--Mar, p 29
High cost rare earth metals give a lot for the money--Nov, p 64
Honeycomb structures maintain strength while cutting weight--Nov, p 36
Magnesium and beryllium save weight and conserve energy--Jan, p 30
Metal alloys solve heat problems without sacrificing strength--Feb, p 27
Photography--A valuable materials testing accessory--June, p 74
Titanium alloys are stronger and resist higher temperatures--May, p 53
Try copper to dampen noise, fight heat and for die casting--Apr, p 26
Want tougher carbon and graphite? Try metal or ceramic impregnation--Sept, p 42
What makes a good bicycle--June, p 12
